# Bluetooth Digital Multimeter OW16A/OW16B

Portable design for easy carry ▶

## ◀ NCV non-contact voltage sense

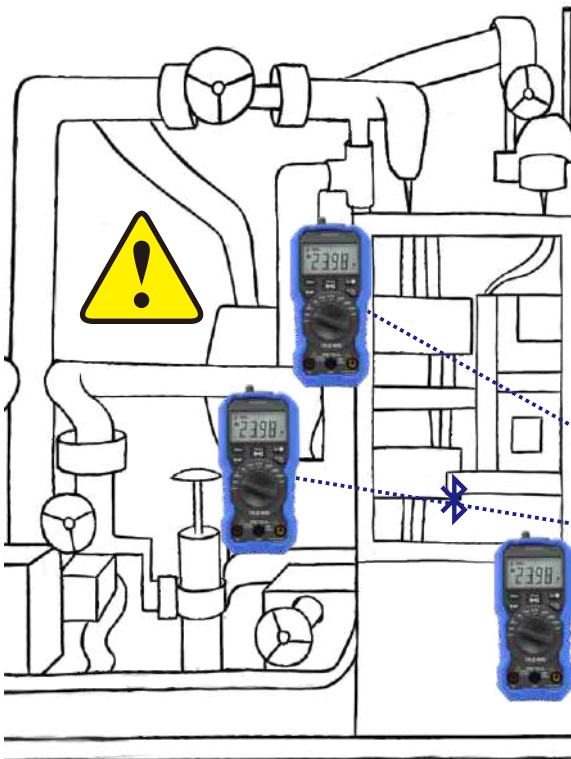

While getting the non-contact voltage sensor close to conductor, the instrument will beeps and flash with the frequency according to AC voltage strength.

Support triode and temperature test ▶

## ◀ BLE 4.0 wireless transmission, support multi-devices connection and single-display monitoring

One mobile end can connect with multiple multimeters, the test object is totally isolated with user to secure their life.

## Not only a multimeter, also a data logger and thermometer.

Real time data are updated and recorded to end user device, no need to be in field. User can define the record time and sampling gap, data can be shown as chart and diagram, multi-devices connection supports data comparison.

User and test object are totally isolated, which secure the life

— current at input — voltage at input — current — temperature  
 the experiments upon the change of current and voltage when charging Li-ion battery  
 the experiments upon the current change of components under different temperature

## Voice broadcast secures the test

After installing the TTS voice pack on smartphone, the app supports voice broadcast. User can focus on wire connection without watching the display value. This assure the connection safety.

## Build-in offline record function

No need to put the end device in field, multimeter will save the data in its memory. Use the smartphone to load the data when connected.
